Reliable Certification Exam Questions and Exam Dumps - 2Pass4sure

Exam : **1z1-161**

Title : Oracle Java Cloud Service
Certified Associate

Vendor : Oracle

Version : DEMO

NO.1 You are getting ready to apply a patch.

What are two common problems that might occur when you attempt to apply a patch? (Choose two)

- A.** A one-off patch may have been applied to the service instance previously
- B.** The service may be busy with scaling, backup, or restoration
- C.** The service may be too busy servicing requests to allow you to apply a patch
- D.** The virtual machines may be unhealthy

Answer: A,C

NO.2 Which two statements are true about the prerequisite requirements for your Oracle Java Cloud Service instance? (Choose two)

- A.** You must create a Database as a Service instance if you want to store older backups for your Oracle Java Cloud Service instance
- B.** You must set the Backup Destination setting to both Cloud Storage and Block Storage when creating a Database as a Service instance for use with Oracle Java Cloud Service
- C.** You can use the same Database as a Service instance with multiple Oracle Java Cloud Service instances according to best practices
- D.** You can use the same SSH public/private key pair when provisioning both the Oracle Java Cloud Service and Oracle Database Cloud - Database as a Service instances according to best practices
- E.** If you forget the passphrase for your virtual machine (VM) SSH public key, it can be recovered by contacting customer support

Answer: B,D

NO.3 You have been given a user account in Oracle Java Cloud Service. You have been granted one or more roles.

Which statement about modifying user details or roles is true?

- A.** A service administrator cannot change how he or she wants to receive notifications from Oracle Cloud
- B.** An identify domain administrator or a service administrator can assign or remove a user's role
- C.** A service administrator can modify another user's details such as first name, last name and email
- D.** An identify domain administrator or a service administrator can reset a user's password

Answer: D

Explanation:

NO.4 You provision an Oracle Java Cloud Service instance with the following configuration:

- * cluster size of 2
- * compute shape set to OC4 (2 OCPUs and 15 GB memory)
- * load balancer enabled with a compute shape set to OC5 (4 OCPUs and 30 GB memory)
- * Oracle Database Cloud - Database as a Service instance with a compute shape set to OC4 (2 OCPUs and 15 GB memory) How many Oracle Compute Units (OCPUs) will be consumed?

- A.** 8
- B.** 5
- C.** 4

- D. 6
- E. 7
- F. 9
- G. 10

Answer: A

NO.5 In your Java Cloud Service instance, you have deployed a Java EE application for the sales activity in your organization. You have created a Sales Admin role, which is meant to manage only the sales application.

What must be the scope of the Sales Admin role?

- A. global
- B. scoped to the sales application
- C. scoped to the Managed Server that is running the sales application
- D. scoped to the Administration Server

Answer: B

NO.6 You want to restore an Oracle Java Cloud Service instance, including its database, from a backup.

Which two tasks must you perform before selecting Restore on the backup? (Choose two)

- A. Use Oracle Database Cloud - Database as a Service to restore the database from the associated database backup, which is identified by its RMAN tag
- B. Shut down the WebLogic Server Administration Server in the service instance
- C. Shut down the WebLogic Server Managed Servers in the service instance
- D. Disable traffic to the load balancer
- E. Shut down the load balancer

Answer: B,E
