Reliable Certification Exam Questions and Exam Dumps - 2Pass4sure

Exam : 251-223

Title : Data Protection Administration for
UNIX using NBU 5.0

Vendors : Symantec

Version : DEMO

NO.1 You want to restrict NetBackup administrative access to users logged into a particular media server.

How do you accomplish this?

- A. add the media server name to the server list, and not the media server list
- B. add the media server name to the media server list, and not the server list
- C. add the media server name to both the server list and the media server list
- D. remove the media server name from both the server list and the media server list

Answer: B

NO.2 Which two statements are true about upgrading an existing NetBackup installation to NetBackup 5.0?

(Choose two.)

- A. All master and media servers must be on the same revision level.
- B. All clients must be on the same revision level as their media servers.
- C. The media servers' revision level may be one level higher than their respective clients' revision level.
- D. The master server's revision level may be one level higher than the media server's revision level.

Answer: CD

NO.3 NetBackup is not able to communicate with a tape device after you have configured it.

What do you verify?

- A. NetBackup is running as root.
- B. Media Manager has been installed.
- C. The operating system has inetd running.
- D. The operating system has mapped the logical device to the physical device.

Answer: D

NO.4 Which command is used to install NetBackup on a UNIX client where rsh is NOT available?

- A. bpcd_install
- B. update_clients
- C. bpclient_install
- D. install_client_files

Answer: D

NO.5 Which two ways can the UNIX client named clientA be configured to have the NetBackup master server

only back up clientA over its backup LAN (which is called clientA-bckup)? (Choose two.)

- A. REQUIRED_INTERFACE = clientA-bckup
- B. NETBACKUP_INTERFACE = clientA-bckup
- C. Universal Settings > NetBackup Interface > clientA-bckup
- D. Universal Settings > Required Network Interface > clientA-bckup

Answer: AD

NO.6 You have just installed a NetBackup 5.0 master server.

Which three NetBackup processes are running if the installation was successful? (Choose three.)

- A. bprd
- B. bptm
- C. bpjobd
- D. bpdbm
- E. bpdm

Answer: ACD

NO.7 You are performing a local UNIX NetBackup client installation.

Which two actions does the install script perform? (Choose two.)

- A. adds entries to the inetd configuration file
- B. tests connections to other NetBackup clients
- C. enters all media servers as SERVER entries to the vm.conf file
- D. enters the master server as a SERVER entry to the bp.conf file

Answer: AD

NO.8 You are installing a new NetBackup client that must communicate across a firewall to its master/media server.

Which NetBackup 5.0 process helps reduce the number of ports that must be opened in the firewall?

- A. inetd
- B. bpcd
- C. vnetd
- D. firewallld

Answer: C

NO.9 On which two operating systems can a remote client installation be performed? (Choose two.)

- A. Microsoft Windows 98 SP1
- B. Microsoft Windows NT 4.0 SP6a
- C. Microsoft Windows Me SP2
- D. Microsoft Windows 2000 SP4

Answer: BD

NO.10 Which NetBackup 5.0 feature can you install during a Microsoft Windows 2003 media server custom installation?

- A. VERITAS Snapshot Provider (VSP)
- B. VERITAS Vault Option
- C. Active Directory Backup tool
- D. Backup Exec Tape Reader for NetBackup

Answer: A

NO.11 After installing the master server, which three daemons should be running if the installation was successful? (Choose three.)

- A. bprd
- B. bptm
- C. bpjobd
- D. bpdbrm
- E. bpdm

Answer: ACD

NO.12 Click the Task button.

Place the steps in the recommended order for installing a master server.

Answer:

NO.13 You are performing a custom client installation on a Microsoft Windows 2003 system. Which two statements are true? (Choose two.)

- A. You can choose NOT to install VSP.

- B. You can change the default port numbers.
- C. You cannot add more than five media servers.
- D. You can set a custom location for the NetBackup catalog.

Answer: AB

NO.14 A Microsoft Windows or UNIX NetBackup client is installed.

Which two commands can be performed on the client to verify proper name resolution of a NetBackup

master server with an IP address of 192.168.1.1 named clientA? (Choose two.)

- A. bpcIntcmd -ip clientA
- B. bpcIntcmd -hn clientA
- C. bpcIntcmd -hn 192.168.1.1
- D. bpcIntcmd -ip 192.168.1.1

Answer: BD

NO.15 Which three capabilities are available in the NetBackup 5.0 calendar-based scheduler? (Choose three.)

- A. run a user backup job
- B. run a NBU catalog backup
- C. exclude a backup job on a specific date
- D. run a backup job on the fourth Friday of the month
- E. run a backup job on the last calendar day of the month

Answer: CDE

NO.16 Which media server version can be upgraded directly to NetBackup 5.0?

- A. 3.4
- B. 4.0
- C. 4.5
- D. 4.7

Answer: C

NO.17 What are three recommendations for NetBackup media server installation? (Choose three.)

- A. You should remove any other vendor backup software.
- B. At least one tape drive should be available for backup operations.
- C. All NetBackup servers should recognize and be recognized by their client systems.
- D. You should make certain that you have a server of a supported hardware type running a supported

version of an OS.

Answer: ACD

NO.18 What are four valid versions of the Microsoft Windows OS for a NetBackup client installation?

(Choose four.)

- A. Microsoft Windows 2003
- B. Microsoft Windows XP
- C. Microsoft Windows ME
- D. Microsoft Windows 2000
- E. Microsoft Windows NT 4.0
- F. Microsoft Windows NT 3.5.1

Answer: ABDE

NO.19 Which three catalogs are contained only on the master server? (Choose three.)

- A. Class
- B. Jobs
- C. Devices
- D. Image

Answer: ABD

NO.20 Given the following scenario about a policy with a single client:

Allow Multiple Data Streams is enabled. ALL_LOCAL_DRIVES is specified. Three tape drives are available

in the Storage Unit. Max Jobs Per Client is set to 2. The client specified has 5 local file systems with no exclude list.

How many backup jobs will be "Active" (not queued) after the policy successfully initiates?

- A. 1
- B. 2
- C. 3
- D. 5

Answer: B

NO.21 Which two statements are true about installing multiple media servers? (Choose two.)

- A. A server license key must be installed on each media server.
- B. All media server installations must be pushed from the master server.
- C. All media server installations should be performed as root/administrator.

D. All media server installations can be pushed from a media server with the same OS.

Answer: AC

NO.22 How many different backup image retention selections are available?

A. 9

B. 10

C. 24

D. 25

E. 99

Answer: D

NO.23 The latest Maintenance Pack has just been applied to your Microsoft Windows master server.

In which directory under <install dir>\ do you validate that it was installed successfully?

A. var

B. pack

C. patch

D. netbackup

Answer: C

NO.24 How do you specify an exclude list for a single policy or schedule?

A. Client properties: UNIX clients or Windows clients: Exclude List Select the policy or schedule

B. Client properties: UNIX clients or Windows clients: Exclude list area type in the name of the policy or schedule before the exclude list

C. Client properties: UNIX clients or Windows clients: Exclude List Exceptions to the Exclude List area

D. Client properties: UNIX clients or Windows clients: Include List Exceptions to the Exclude List area

Answer: B

NO.25 Which script do you execute to uninstall a Maintenance Pack from a UNIX master server?

A. Vrts_pack.uninstall

B. Vrts_patch.uninstall

C. Vrts_pack.install and select Uninstall

D. Vrts_patch.install and select Uninstall

Answer: A

NO.26 Which two criteria can be used to expire physical media? (Choose two.)

- A. date
- B. media full
- C. number of mounts
- D. media moved to a new server
- E. change the backup retention level

Answer: AC

NO.27 Which two statements are true about a media server upgrade installation from version 4.5 to version 5.0? (Choose two.)

- A. All clients must be on 5.0 if their media server is on 5.0.
- B. All master and media servers must be on NetBackup 5.0.
- C. The media servers must be on 4.5 or 5.0 if the clients are on 4.5.
- D. The master server can be upgraded to 5.0, and media servers can remain at 4.5.

Answer: CD

NO.28 Which three commands can help resolve NetBackup network problems? (Choose three.)

- A. ping
- B. bpverify
- C. nslookup
- D. nbclntcmd -ip
- E. bpclntcmd -hn

Answer: ACE

NO.29 You are troubleshooting a robot or drive error and require additional Media Manager logs.

Which two debug directories can you create for robot or drive error troubleshooting? (Choose two.)

- A. ltid
- B. bpcd
- C. reqlib
- D. bpdm

Answer: AC

NO.30 Which two actions do you perform prior to upgrading a media server from NetBackup 4.5 to 5.0?

(Choose two.)

- A. stop all bpsched processes
- B. delete the existing bp.conf file
- C. stop all of the NetBackup and Media Manager daemons
- D. save copies of customized NetBackup scripts

Answer: CD
